

## **2005–06 Local Systemic Change Project Team Interview Guidelines**

Each year, Lead Evaluators are asked to conduct interviews with PIs and the project team to obtain information regarding project plans and progress toward sustaining the LSC reforms. These protocols are provided to aid evaluators in collecting information that will contribute to answering the core evaluation questions; write-ups of these interviews should *not* be sent to HRI.

### **Project Team Interview: Final Year, Lessons Learned**

In this last year of core evaluation data collection, all projects will conduct project team interviews which focus on lessons learned. The Lead Evaluator should interview the PI of Final Year projects about lessons learned, as well as the project's strategies for making sure the LSC reforms continue after the funding period.
