Question 1

On average, how many minutes per day in elementary classes is devoted to instruction in:

- I. Reading/language arts? _____
- II. Mathematics? _____
- III. Science? _____
- IV. Social Studies? _____

Instructional Time: Elementary Classes

Elementary Science and Mathematics

- Nearly all elementary teachers teach mathematics every day of every week.
- Science is a different story:

	Percent of Classes	
	K-3	4-6
All/Most Days, every week	20	35
Three or fewer days, every week	39	33
Some weeks, but not every week	41	32

Question 2

What percentage of elementary teachers feels very well prepared to teach:

- I. Reading/language arts? _____
- II. Mathematics? _____
- III. Science? _____
- IV. Social Studies? _____

Perceptions of Preparedness: Elementary

Very Well Prepared

Perceptions of Preparedness: Elementary

Very Well Prepared

Perceptions of Preparedness: Elementary

Very Well Prepared

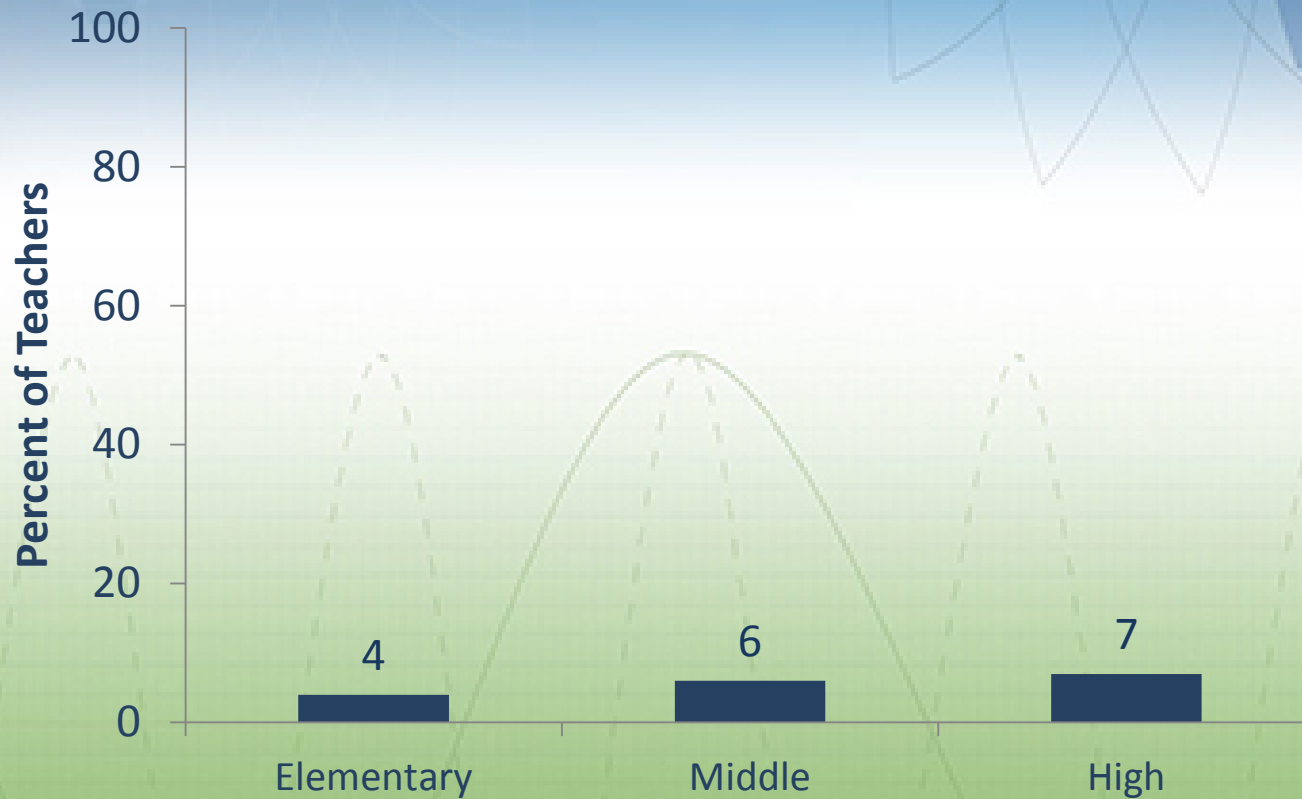

Question 3

What percentage of teachers at each grade level feels very well prepared to teach engineering?

- I. Elementary _____
- II. Middle _____
- III. High _____

Preparedness to Teach Engineering

Very Well Prepared

Session Structure

- Introductions
- About the 2012 National Survey of Science and Mathematics Education
- The STEM Teaching Force
- STEM Instruction
- Professional Development
- Implications for the Future

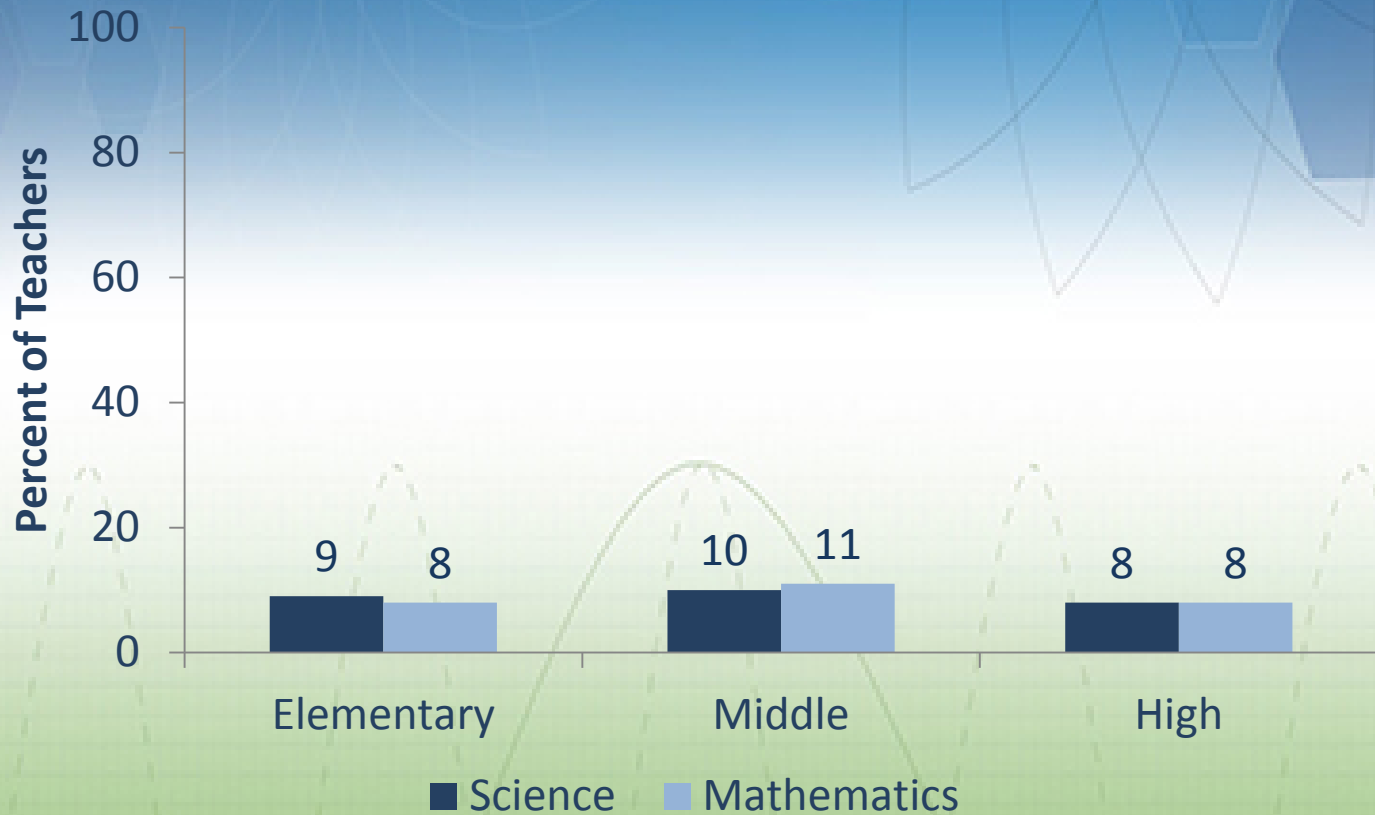

About the 2012 National Survey of Science and Mathematics Education

- Two-stage sample that targeted:
 - 2,000 schools (public and private)
 - Over 10,000 K-12 teachers

- Excellent response rate:
 - 1,504 schools agreed to participate
 - Over 80 percent of program representatives
 - Over 75 percent of sampled teachers

The STEM Teaching Force

Percent Non-White

Question 4

About what percentage of high school science teachers has a college degree in a science discipline?

- a. 50 percent
- b. 60 percent
- c. 70 percent
- d. 80 percent

Science Teacher Degrees

Science Coursework

High School Science Teachers

Question 5

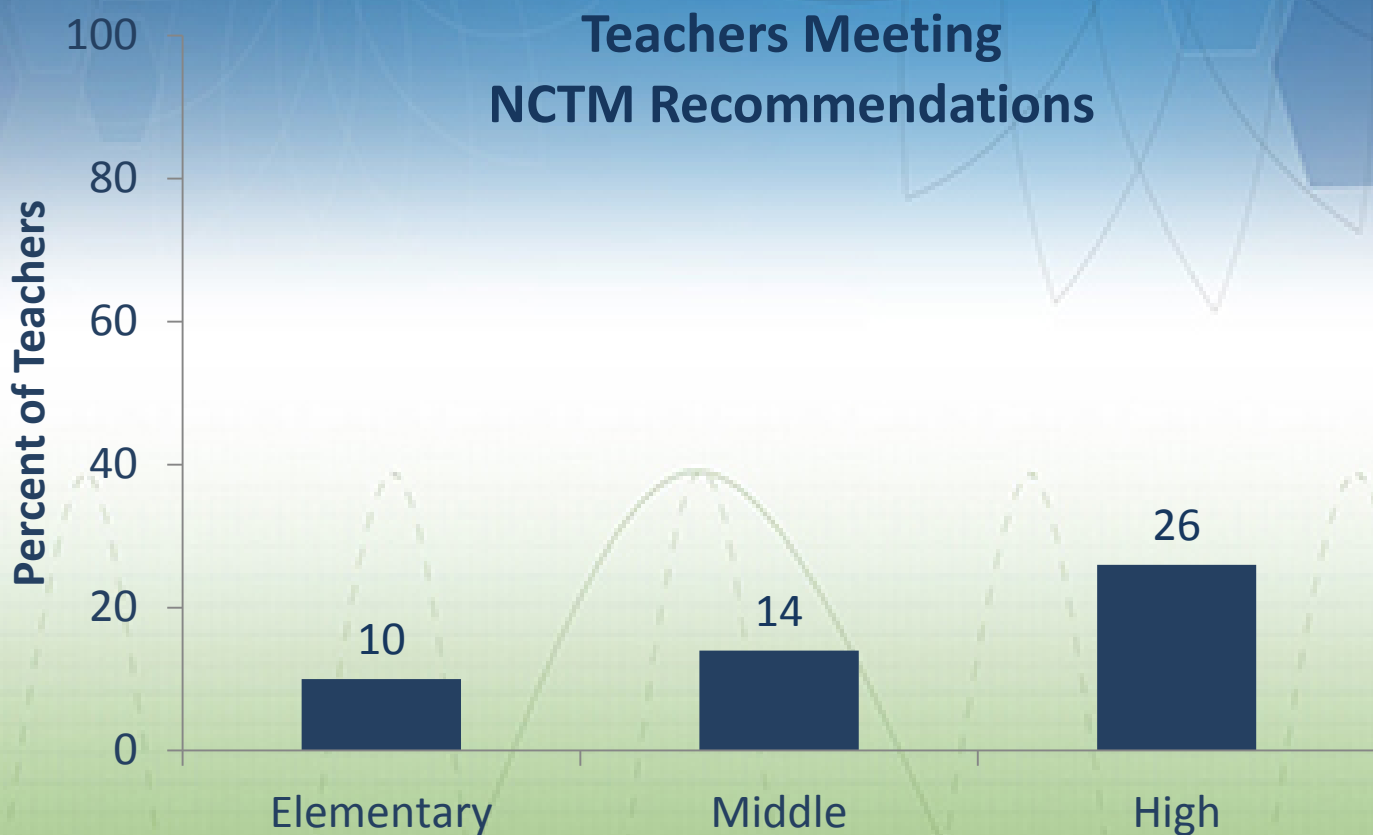

About what percentage of high school mathematics teachers has a college degree in mathematics?

- a. 50 percent
- b. 60 percent
- c. 70 percent
- d. 80 percent

Mathematics Teacher Degrees

Mathematics Coursework

Teacher Beliefs

Question 6

About what percentage of science and mathematics teachers believes students should be given definitions for new vocabulary at the beginning of instruction on an idea?

- a. 20 percent
- b. 40 percent
- c. 60 percent
- d. 80 percent

Beliefs about Teaching and Learning

- Over three-quarters of science and mathematics teachers at each grade level agree that inadequacies in students' background can be overcome by effective teaching.
- A large proportion believe that students learn best in classes of similar abilities:

	Science	Mathematics
Elementary	32	51
Middle	48	69
High	65	77

Views about Effective Instruction Vary: Science

- Three-quarters at each grade range agree that it is better to focus on ideas in depth, even if it means covering fewer topics.
- About 40 percent think teachers should explain ideas to students before having them consider evidence for it.
- More than half think hands-on/laboratory activities should be used primarily to reinforce ideas students have already learned.
- Over 70 percent think students should be given definitions for new vocabulary at the beginning of instruction.

Views about Effective Instruction Vary: Mathematics

- Over three-quarters at each grade range agree that it is better to focus on ideas in depth, even if it means covering fewer topics.
- 37-48 percent think teachers should explain ideas to students before having them investigate the idea.
- 39-52 percent think hands-on activities/manipulatives should be used primarily to reinforce ideas already learned.
- 81-90 think students should be given definitions of new vocabulary at the beginning of instruction

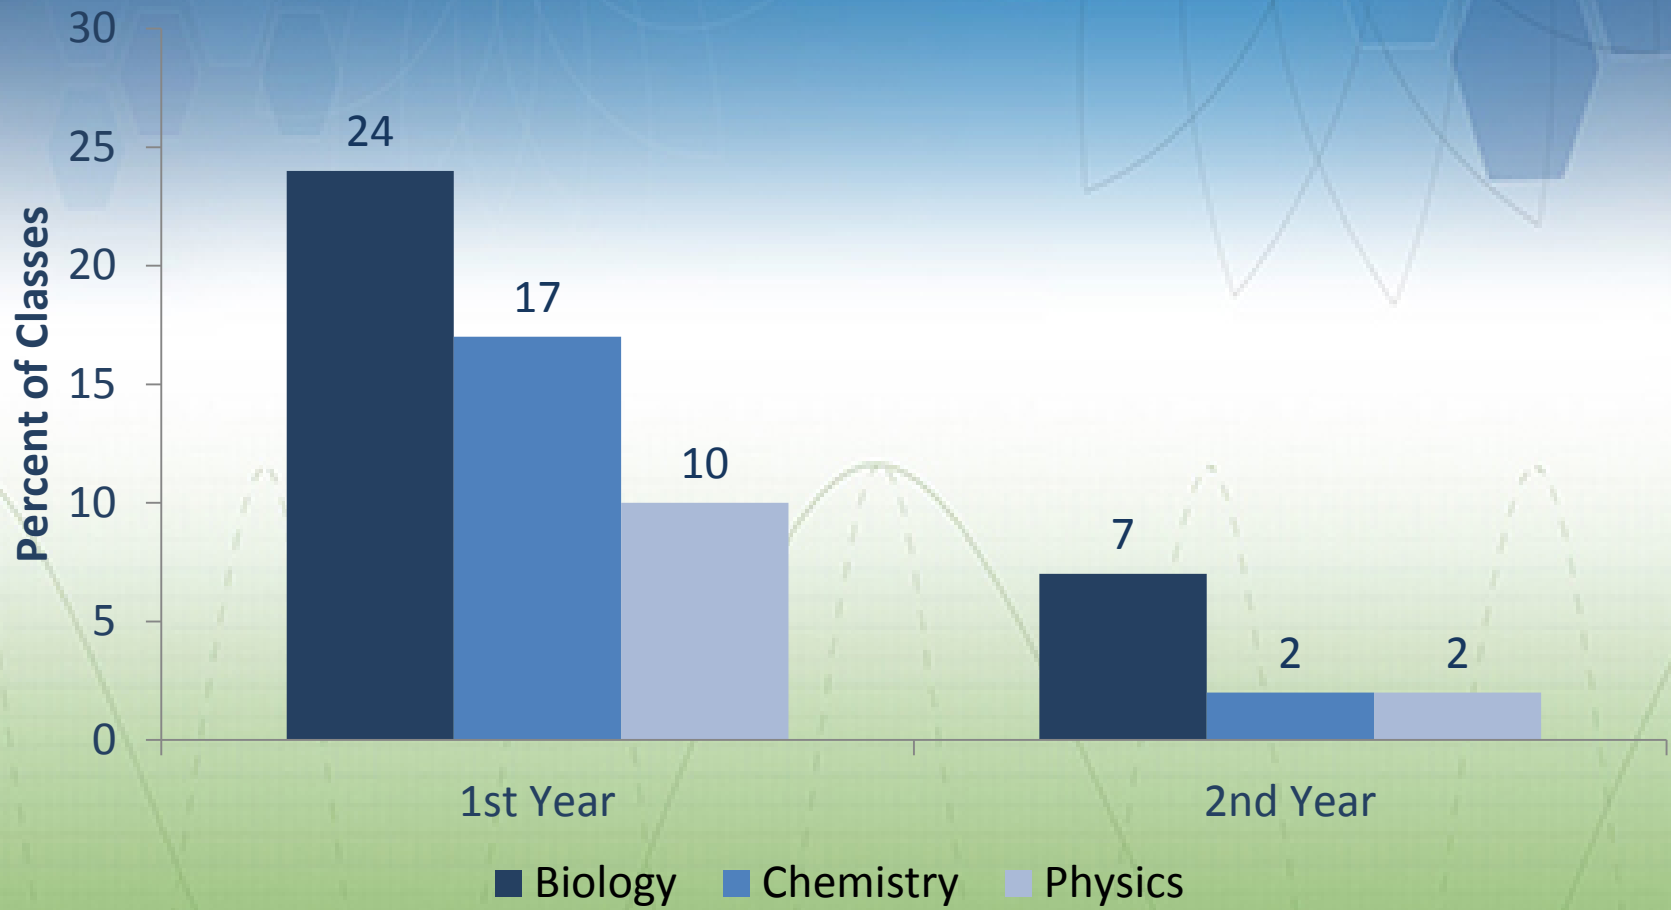

The Future STEM Workforce

Question 7

Compared to lower-level high school courses, students in advanced science and mathematics courses are:

- a. Less diverse.
- b. Just as diverse.
- c. More diverse.

High School Science Courses Offered

High School Mathematics Courses Offered

Student Enrollment: HS Science

Percent Female

- Non-College Prep 46
- 1st Year Biology 49
- 1st Year Chemistry 51
- 1st Year Physics 49
- Advanced Courses 54

Student Enrollment: HS Science

Percent Non-Asian Minority

- Non-College Prep 36
- 1st Year Biology 33
- 1st Year Chemistry 30
- 1st Year Physics 23
- Advanced Courses 21

Student Enrollment: HS Mathematics

	Percent Female
• Non-College Prep	42
• Formal Level 1	48
• Formal Level 2	50
• Formal Level 3	51
• Formal Level 4	48
• College-Credit Courses	48

Student Enrollment: HS Mathematics

Percent Non-Asian Minority

- Non-College Prep 45
- Formal Level 1 39
- Formal Level 2 31
- Formal Level 3 27
- Formal Level 4 22
- College-Credit Courses 17

Science and Mathematics Instruction

Weekly Instructional Practices: Science

Weekly Instructional Practices: Math

Question 8

About what percentage of middle school science classes uses a published textbook or module as the primary instructional material?

- a. 40 percent
- b. 60 percent
- c. 80 percent
- d. 100 percent

Classes Using a Published Text

STEM PD

Features of High Quality PD

- Focuses on content knowledge;
- Emphasizes active learning;
- Promotes coherence;
- Provides a large amount of training sustained over time; and
- Encourages collaboration among teachers.

Garet, M. S., Porter, A. C., Desimone, L., Birman, B. F., & Yoon, K. S. (2001). What makes professional development effective? Results from a national sample of teachers. *American educational research journal*, 38(4), 915–945.

Question 9

About what percentage of elementary teachers has participated in science-specific PD in the last three years?

- a. 30 percent
- b. 40 percent
- c. 50 percent
- d. 60 percent

Teachers Participating in PD in Last 3 Years

Less than 6 hours of PD in last 3 years

More than 35 hours of PD in last 3 years

Question 10

About what percentage of high school mathematics teachers has participated in a mathematics-specific professional learning community (PLC) in the last three years?

- a. 60 percent
- b. 70 percent
- c. 80 percent
- d. 90 percent

Science Teacher PD in Last 3 Years

Math Teacher PD in Last 3 Years

The Typical PLC...

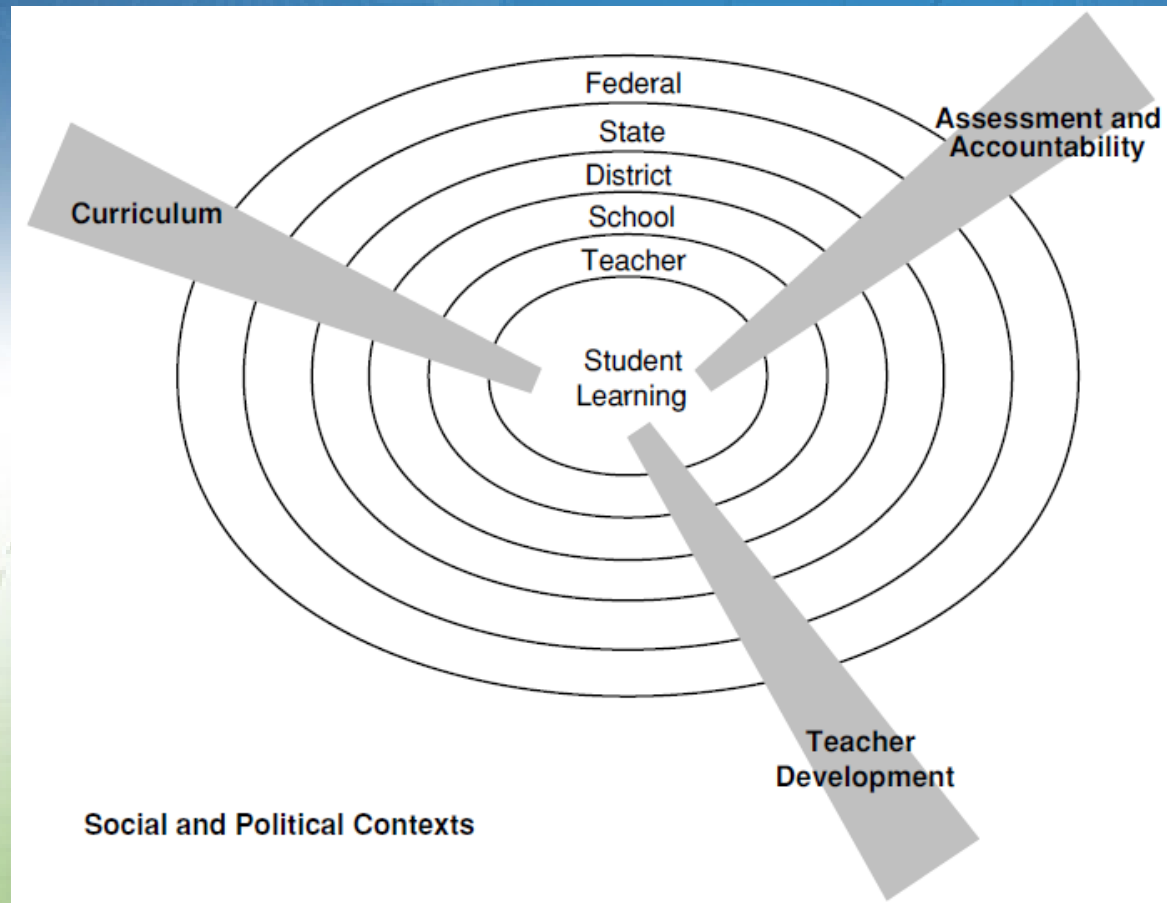

- Requires participation
- Meets for the entire year
- Meets at least twice a month
- Has a designated leader from within the school
- Limits participation to teachers from within school
- Includes teachers from multiple grade levels

Emphasis of PLCs

	Percent of Schools with PLCs	
	Science	Mathematics
Analyze student assessment results	73	83
Analyze instructional materials	65	65
Plan lessons together	67	62
Analyze classroom artifacts	37	34
Engage in science/mathematics investigations	25	30

Systems Approach to Change

Where Can You Make a Difference?

National Research Council. (2002). *Investigating the influence of standards: A framework for research in mathematics, science, and technology education*. I.R. Weiss, M.S. Knapp, K.S. Hollweg, and G. Burrill (Eds.), Committee on Understanding the Influence of Standards in K-12 Science, Mathematics, and Technology Education, Center for Education, Division of Behavioral and Social Sciences and Education. Washington, DC: National Academy Press.
