## The 2018 NSSME +

JUNE 11, 2019

## Today's Schedule

1:00-1:40 Computer Science

1:45-2:30 Mathematics

2:35-3:20 Science

3:20-3:30 Wrap-up

## About the 2018 NSSME +

- The 2018 NSSME+ is the sixth in a series of surveys dating back to 1977.
- The 2018 NSSME+ included a new focus on computer science education.

The 2018 NSSME+, and this presentation, is based upon work supported by the National Science Foundation under Grant No. DGE-1642413. Any opinions, findings, and conclusions or recommendations expressed are those of the authors and do not necessarily reflect the views of the National Science Foundation.

## Topics Addressed

## Six different survey instruments

- Characteristics of the science/mathematics/ computer science teaching force:
- demographics
- preparation for teaching
- beliefs about teaching and learning
- perceptions of preparedness
- Instructional practices
- Factors that shape teachers' decisions about content and pedagogy
- Use of instructional materials
- Opportunities teachers have for professional growth

## Who's In the Sample

Two-stage random sample that targeted:

- 2,000 schools (public and private)
- Over 10,000 K-12 teachers

Very good response rate:

- 1,273 schools participated
- 86 percent of program representatives
- 78 percent of sampled teachers

## Endorsing Organizations

- American Association of Chemistry Teachers
- American Association of Physics Teachers
- American Federation of Teachers
- Association of Mathematics Teacher Educators
- American Society for Engineering Education
- Association of State Supervisors of Mathematics
- Association for Science Teacher Education
- Council of State Science Supervisors
- Computer Science Teachers Association
- National Association of Biology Teachers
- National Association of Elementary School Principals
- National Association of Secondary School Principals
- National Council of Supervisors of Mathematics
- National Council of Teachers of Mathematics
- National Earth Science Teachers Association
- National Education Association
- National Science Education Leadership Association
- National Science Teachers Association

## Interpreting Results

After data collection, design weights were computed, adjusted for nonresponse, and applied to the data.

The sampling and weighting processes mean that the results are national estimates of schools, teachers, and classes-not characteristics of the respondents.

## Equity

We're also sharing data disaggregated by factors historically associated with differences in students' educational opportunities:

- School-level Factors
- Percentage of students in the school eligible for free or reduced-price lunch (FRL)
- School size
- School community type (rural, urban, suburban)
- Class-level Factors
- Percentage students in the class from race/ethnicity groups historically underrepresented in STEM (HU)
- Prior achievement level of students in the class

## www.horizon-research.com/NSSME

## Current reports:

- Technical report
- Highlights report
- Compendium of Tables
- Subject/Grade-level reports and compendia

## Coming Soon:

- Equity reports
- Trend reports
- Monitoring Progress report
- NGSS report
- Novice Teacher reports

@NSSMEatHRI \#NSSME

## Session Overview

## For Each Subject:

- Current Status of Instruction
- Resources for Instruction
- The Teaching Force
- Professional Development Experiences

$$

## Objectives Receiving a Heavy Emphasis

## Instructional Activities: Weekly

THE NATIONAL SURVEY OF SCIENCE \& MATHEMATICS EDUCATION

$$
\frac{\text { harsizon }}{\text { RESEARCH.1NC }}
$$

## Engagement in Computer Science Practices

The 2018 NSSME+ included a series of items asking how often students were engaged in aspects of the computer science practices:

1. Fostering an inclusive computing culture
2. Collaborating around computing
3. Recognizing and defining computational problems
4. Developing and using abstractions
5. Creating computational artifacts
6. Testing and refining computational artifacts
7. Communicating about computing

## Engagement in Computer Science Practices

Students are often engaged in aspects of computer science related to developing computational artifacts

## Developing Computational Artifacts: Weekly

THE NATIONAL SURVEY OF SCIENCE \& MATHEMATICS EDUCATION

## Engagement in Computer Science Practices

Students are often engaged in aspects of computer science related to developing computational artifacts

Students tend not to be engaged very often in aspects of computer science related to communicating with end-users or considering diverse needs

## Considering End Users: Weekly

## Instructional Materials

About what percentage of high school computer science classes base instruction on commercially published textbooks at least once a week?
A. $25 \%$
B. $50 \%$
C. $75 \%$
D. $100 \%$

## Instructional Materials Used (Weekly)

## Percent of Classes

| Teacher-developed units or lessons | 64 |
| :--- | :--- |
| Units or lessons from websites that are free | 43 |
| Self-paced online courses or units | 32 |
| Units or lessons from other sources (e.g., conferences or <br> colleagues) | 28 |

Commercially published textbooks (printed or online) ..... 26
Lessons or resources from websites that have a subscription fee or cost ..... 9
State, county, district, or diocese-developed unit or lessons ..... 7

## Factors Perceived as Problems

THE NATIONAL SURVEY OF SCIENCE \& MATHEMATICS EDUCATION

$$
\frac{\text { har izorr }}{\text { RE S EAR CH. INC. }}
$$

## Computer Science Instruction Takeaways

Only about half of high schools offer computer science; it is less common in smaller schools, high-poverty schools, and rural schools

Computer science instruction is relatively rare at elementary and middle schools

On average, female students and students from racelethnicity groups historically underrepresented in STEM make up less than a third of students in high school computer science classes

Students work on creating computational artifacts often, but are not asked to attend to end-users' needs nearly as often

Teachers are often using self-developed units and lessons, and picking and choosing from other sources, raising questions about quality and coherence

## The Computer Science Teaching Force

The 2018 NSSME+ collected data about:

- Demographics of teachers
- College degrees and coursework
- Path to certification
- Feelings of preparedness
- Beliefs about teaching and learning

## Teaching Experience

## Teaching Experience

THE NATIONAL SURVEY OF SCIENCE \& MATHEMATICS EDUCATION

## Certification

About what percentage of high school computer science teachers are certified to teach computer science?
A. $25 \%$
B. $50 \%$
C. $75 \%$
D. $100 \%$

## Areas of Certification

## Degree in Computer Science/ Related Field/CS Education

## Computer Science Teacher Degrees

## CSTA/ISTE CS Teacher Preparation Recommendations

Similar recommended content knowledge for CS educators from CSTA and ISTE

Combined, they suggest teachers have coursework in four content areas:

- Programming
- Algorithms
- Data structures
- Computer systems or networks

# Coursework Related to CSTA/ISTE Course-Background Standards 

## Percent of HS CS Teachers

Courses in 0 areas
Courses in 1-2 areas

- Courses in 3-4 areas

## Perceptions of Preparedness

The 2018 NSSME+ included items about teachers' feelings of preparedness to:

- Teach core computer science ideas
- Use student-centered pedagogies, e.g.:
- Use formative assessment
- Develop student abilities to do computer science
- Encourage student interest in computer science
- Differentiate instruction
- Incorporate students' cultural backgrounds into instruction

## Perceptions of Preparedness: Very Well Prepared to Teach CS Topics

THE NATIONAL SURVEY OF SCIENCE \& MATHEMATICS EDUCATION

Perceptions of Preparedness: Very Well Prepared to Use StudentCentered Pedagogies

## Teacher Beliefs

## Teacher Beliefs

THE NATIONAL SURVEY OF SCIENCE \& MATHEMATICS EDUCATION

## Computer Science Teachers Takeaways

Sizeable proportion of the computer science teacher workforce is newer, or new to teaching computer science, and likely still honing their craft

Many have limited preparation to teach computer science

Teachers' beliefs about teaching and learning indicate only partial alignment with what is known about how students learn

## Inservice Support

## The 2018 NSSME+ asked about:

- School/district-offered induction programs
- School/district-offered professional development (workshops, study groups/PLCs, coaching)
- Teacher PD experiences

## Professional Development

About what percentage of high school computer science teachers have had any computer sciencerelated PD in the last three years?
A. $25 \%$
B. $50 \%$
C. $75 \%$
D. $100 \%$

## Professional Development

## Hours of PD in Last 3 Years

- None
$\square<6$ hours
- 6-35 hours

36+ hours

## Types of Professional Development in the Past Three Years

THE NATIONAL SURVEY OF SCIENCE \& MATHEMATICS EDUCATION

## Characteristics of PD

|  | Percent of HS CS <br> Teachers Attending PD |
| :--- | :---: |
| Engage in activities to learn computer science content | 76 |
| Experience lessons as students | 62 |
| Work with those teaching the same subject/grade level | 51 |
| Examine classroom artifacts | 46 |
| Apply what they learn in classroom and come back to <br> discuss | 39 |
| Rehearse instructional practices | 31 |
| Work closely with other teachers in school | 26 |

## Emphasis of PD

## Topics Receiving Heavy Emphasis

THE NATIONAL SURVEY OF SCIENCE \& MATHEMATICS EDUCATION

## Inservice Support Takeaways

A relatively large proportion of HS CS Teachers have had substantial PD experiences in the last three years; still, many others have not

PD is mostly engaging teachers in CS activities, often with the goals of increasing their own content knowledge

Less emphasis on helping teachers improve their instructional practice or encourage and support students from diverse backgrounds

$$
\frac{\text { harizon }}{\text { RESEARCH, INC. }}
$$

## The 2018 NSSME +

JUNE 11, 2019

## K-12 Mathematics Instruction

- What is the current status of $\mathrm{K}-12$ mathematics instruction?
- Who has access to mathematics instruction?
- Why might instruction look the way it does?

## Mathematics Instruction

## The 2018 NSSME+ collected data about:

- Instructional time
- Course offerings
- Instructional objectives
- Pedagogies
- Mathematical practices
- Amount of homework and external testing

## Instructional Time: Elementary

## Course Offerings and Enrollment

- About three-fourths of middle schools have at least some students completing Algebra 1 prior to $9^{\text {th }}$ grade
- $8^{\text {th }}$ graders in low FRL schools are more likely than those in high FRL schools to complete Algebra 1 before $9^{\text {th }}$ grade
- Differences are also evident by community type ( $\mathrm{S}>\mathrm{U}>\mathrm{R}$ )

## High Schools Offering Various Mathematics Courses

|  | Percent of <br> Schools |
| :--- | :---: |
| Non-college prep (e.g., Remedial Math, General Math, Consumer Math) | 79 |
| Formal/College prep level 1 (e.g., Algebra 1, Integrated Math 1) | 98 |
| Formal/College prep level 2 (e.g., Geometry, Integrated Math 2) | 93 |
| Formal/College prep level 3 (e.g., Algebra 2, Algebra and Trigonometry) | 91 |
| Formal/College prep level 4 (e.g., Pre-Calculus, Algebra 3) | 90 |
| Courses that might qualify for college credit (e.g., AP Calculus, AP Statistics) | 72 |

## Average Percentages of HU Students in High School Mathematics Courses

|  | Percent HU <br> Students |
| :--- | :---: |
| Non-college prep (e.g., Remedial Math, General Math, Consumer Math) | 53 |
| Formal/College prep level 1 (e.g., Algebra 1, Integrated Math 1) | 38 |
| Formal/College prep level 2 (e.g., Geometry, Integrated Math 2) | 39 |
| Formal/College prep level 3 (e.g., Algebra 2, Algebra and Trigonometry) | 37 |
| Formal/College prep level 4 (e.g., Pre-Calculus, Algebra 3) | 33 |
| Courses that might qualify for college credit (e.g., AP Calculus, AP Statistics) | 22 |

## Objectives Receiving a Heavy Emphasis

$\square$ Elementary $\square$ Middle $\square$ High

## Instructional Activities: Weekly

THE NATIONAL SURVEY OF SCIENCE \& MATHEMATICS EDUCATION

## Standards for Mathematical Practice: Weekly

THE NATIONAL SURVEY OF SCIENCE \& MATHEMATICS EDUCATION

## Required External Mathematics Testing

Approximately what percentage of elementary classes are required to take three or more state/district mathematics assessments in a year?

A. $25 \%$<br>B. 50\%<br>C. $75 \%$<br>D. 100\%

## Required External Mathematics Testing

|  | Percent of Classes |  |  |
| :--- | :---: | :---: | :---: |
|  | Elementary | Middle | High |
| Never | 9 | 1 | 20 |
| Once a year | 9 | 12 | 25 |
| Twice a year | 9 | 11 | 22 |
| Three or four times a year | 48 | 43 | 24 |
| Five or more times a year | 25 | 33 | 10 |

## Equity Analyses: Classes Required to Take Two or More External Mathematics Assessments Per Year

Prior Achievement

THE NATIONAL SURVEY OF SCIENCE \& MATHEMATICS EDUCATION

## Equity Analyses: Classes Required to Take Two or More External Mathematics Assessments Per Year

Percent FRL in School

## Instruction Takeaways

Heavy emphasis on developing conceptual understanding and on how mathematics is done, but not developing student confidence or interest in mathematics.

Lecture and whole class discussion are common activities.

Most classes engage with the Standards for Mathematical Practice on a weekly basis.

External testing is prevalent and more common in classes of low prior achievers and high percent HU students.

## Why Might Instruction Look This Way? <br> The 2018 NSSME+ asked about:

- School spending
- Availability of resources, including instructional materials
- Adequacy of resources
- Instructional materials used

## Median School Spending Per Pupil for Mathematics

THE NATIONAL SURVEY OF SCIENCE \& MATHEMATICS EDUCATION

## Median School Spending Per Pupil for Mathematics

THE NATIONAL SURVEY OF SCIENCE \& MATHEMATICS EDUCATION

## Adequacy of Resources for Mathematics Instruction

## Teachers rated the adequacy of their

- Instructional technology (e.g., calculators, computers, probes/sensors)
- Measurement tools (e.g., protractors, rulers)
- Manipulatives (e.g., pattern blocks, algebra tiles
- Consumable supplies (e.g., graph paper, batteries)

## Teachers' Views of Adequacy of Resources

Class Mean Composite Scores

THE NATIONAL SURVEY OF SCIENCE \& MATHEMATICS EDUCATION

## Designated Instructional Materials

## What Is Designated

|  | Percent of Classes |  |  |
| :--- | :---: | :---: | :---: |
|  | Elementary | Middle | High |
| Commercially published textbooks | 89 | 88 | 91 |
| State, county, or district-developed units or <br> lessons | 44 | 37 | 32 |
| Lessons or resources from websites that <br> are free | 28 | 30 | 24 |
| Lessons or resources from websites that <br> have a subscription fee or cost | 31 | 22 | 15 |
| Self-paced online courses or units | 33 | 33 | 13 |

## Instructional Materials

Approximately what percentage of secondary classes use a commercially published textbook on a weekly basis?

A. 20\%<br>B. $40 \%$<br>C. 60\%<br>D. $80 \%$

## What Teachers Use (Weekly)

|  | Percent of Classes |  |  |
| :--- | :---: | :---: | :---: |
|  | Elementary | Middle | High |
| Commercially published textbooks | 76 | 65 | 61 |
| Teacher-developed units or lessons | 44 | 65 | 78 |
| Units or lessons from other sources (e.g., <br> conferences, colleagues) | 30 | 31 | 35 |
| Lessons or resources from websites that <br> are free | 37 | 39 | 27 |
| State, county, or district-developed units <br> or lessons | 41 | 26 | 23 |
| Lessons or resources from websites that <br> have a cost | 54 | 34 | 19 |
| Self-paced online courses or units | 36 | 24 | 12 |

THE NATIONAL SURVEY OF
SCIENCE \& MATHEMATICS EDUCATION

## Resources Takeaways

Spending on resources for mathematics instruction has outpaced inflation at the elementary and middle school levels.

Mathematics teachers have positive views about their resources for mathematics instruction.

Teachers use a hodgepodge of instructional materials raising questions about quality and coherence.

## The Mathematics Teaching Force

## The 2018 NSSME+ collected data about:

- Demographic of teachers
- Path to certification
- College coursework
- Beliefs about teaching and learning
- Feelings of preparedness

## Teaching Experience

## Equity Analyses: Classes Taught by Novice Teachers

■ Courses in 5-6 areas

- Courses in 7 areas

## Teacher Beliefs

What percentage of teachers believe they should ask students to justify their mathematical thinking?
A. $25 \%$
B. $50 \%$
C. $75 \%$
D. $100 \%$

## Teacher Beliefs

THE NATIONAL SURVEY OF SCIENCE \& MATHEMATICS EDUCATION

## Teacher Beliefs

## Mathematics Teaching Force Takeaways

Classes of mostly low-prior-achieving students and those with the highest proportion of historically underrepresented in STEM are more likely to be taught by novice teachers and those without mathematics or mathematics education degrees.

Across grade levels, teachers generally perceive they are well prepared regarding the content they teach, although many lack the breadth and extent of formal preparation that is recommended.

Teachers' beliefs about teaching and learning indicate only partial alignment with what is known about how students best learn mathematics.

## Inservice Support

## The 2018 NSSME+ asked about:

- Teacher professional development experiences
- School/district-offered professional development programs
- School/district-offered induction programs

## Hours of Mathematics Professional Development in Last Three Years

## Characteristics of Mathematics Professional Development

|  | Percent of Teachers |  |  |
| :--- | :---: | :---: | :---: |
|  | Elementary | Middle | High |
| Work closely with teachers in school <br> Work with those teaching same subject or <br> grade level | 69 | 72 | 67 |
| Apply what they learn in classroom and <br> come back to discuss | 56 | 58 | 57 |
| Examine classroom artifacts | 44 | 46 | 46 |
| Engage in math investigations | 46 | 49 | 44 |
| Experience lessons as students | 46 | 47 | 43 |
| Rehearse instructional practices | 48 | 45 | 42 |

## Emphasis of Mathematics Professional Development

What area do you think is receiving a heavy emphasis in mathematics professional development?
A. Deepening content knowledge
B. Differentiating instruction
C. Incorporating students' cultural backgrounds
D. Implementing instructional materials

## Heavy Emphasis of Mathematics Professional Development

## Inservice Support Takeaways

A majority of teachers have had some mathematics focused professional development in the last three years, but it may not be sufficient, especially for elementary teachers.

Professional development often has characteristics identified as high quality.

Professional development is emphasizing key areas such as differentiating instruction and monitoring student understanding, but is less likely to focus on culturally responsive teaching.

## The 2018 NSSME +

JUNE 11, 2019

$$
\begin{aligned}

\end{aligned}
$$

$\frac{\text { harizon }}{\text { RESEABCH.INC }}$

## NSSME and NGSS

- This presentation follows a similar structure to the computer science and mathematics, except for occasional analyses by NGSS adoption status
- 2013-14: 15 states and DC (early adopters)
- 2015-17: 24 states (late adopters)
- 11 states had not adopted as of August 2018
- The 2012 NSSME data are baseline with regard to NGSS.

## Science Instruction

- Instructional objectives
- Science instructional time (elementary)
- Engagement with science practices
- Instructional activities

## Objectives Receiving a Heavy Emphasis

$\square$ Elementary $\quad$ Middle $\quad$ High

$$
\frac{\text { Rar izorl }}{\text { R E S EAR CH, INC. }}
$$

## Heavy Emphasis on Learning Science Vocabulary/Facts

## Elementary Classes Receiving Science Instruction All/Most Days

## Elementary Classes Receiving Science Instruction All/Most Days

## Instructional Time: Elementary

About how much time does the typical elementary class spend on science instruction each day?
A. 10 minutes
B. 20 minutes
C. 30 minutes
D. 40 minutes

## Instructional Time: Elementary

## Instructional Activities: Weekly

THE NATIONAL SURVEY OF SCIENCE \& MATHEMATICS EDUCATION

$$
\frac{\text { Rar izorl }}{\text { R E S EAR CH, INC. }}
$$

## Engagement in Science Practices

## The 2018 NSSME+ included a series of items asking how often students were engaged in aspects of the science practices:

1. Asking questions/defining problems
2. Developing and using models
3. Planning and carrying out investigations
4. Analyzing and interpreting data
5. Using mathematics and computational thinking
6. Constructing explanations/designing solutions
7. Engaging in argument from evidence
8. Obtaining, evaluating, and communicating information

## Engagement in Science Practices

Students are often engaged in aspects of science related to conducting investigations and analyzing data.

## Conducting Investigations and Analyzing Data

$\square$ Elementary $\quad$ Middle $\quad$ High

## Engagement in Science Practices

Students are often engaged in aspects of science related to conducting investigations and analyzing data.

Students tend to not be engaged very often in aspects of science related to evaluating the strengths/limitations of evidence and the practice of argumentation.

## Evaluating Evidence and Arguing

Weekly

## Engaging Students in the Practices of Science Composite

## Instruction Takeaways

Instructional time for science at the elementary still relatively low

Heavy emphasis on developing conceptual understanding, but not on how science is done, or how knowledge is generated and revised

Students conduct investigations and analyze data fairly often, but not asked to think critically nearly as often

## Resources for Instruction

- Instructional materials
- Other resources

## Instructional Materials

For most classes, districts designate instructional materials to be used:

## Designated Instructional Materials-All Grades

$$
\frac{\text { Rar izorl }}{\text { R E S EAR CH, INC. }}
$$

## Designated Instructional Materials-Elementary

$\square$ Early ■ Late ■ Non

$$
\frac{\text { harizon }}{\text { RESEARCH, INC. }}
$$

## Instructional Materials

For most classes, the most recent unit was based on a commercially published textbook or a material developed by the state/district.

## Instructional Materials

About what percentage of science classes use instructional materials published before 2010?
A. $30 \%$
B. $40 \%$
C. $50 \%$
D. $60 \%$

## Science Classes Using Textbooks Published before 2010

## Ways Elementary Teachers Used Their Textbook in Most Recent Unit

## Median School Spending Per Pupil for Science

## Median School Spending Per Pupil for Science

THE NATIONAL SURVEY OF SCIENCE \& MATHEMATICS EDUCATION

## Equity Analysis

## Spending by percentage of students eligible for

 FRL in school

## Equity Analysis

## Spending by percentage of students eligible for

 FRL in school

## Resources Takeaways

Commercially published materials heavily influence instruction.

Large proportions of classes in NGSS-adopting states use pre-NGSS materials.

Schools with high percentages of students eligible for FRL spend substantially less per pupil than schools with fewer students eligible for FRL.

## The Science Teaching Force

The 2018 NSSME+ collected data about:

- Beliefs about teaching and learning
- Feelings of preparedness
- Path to certification
- College coursework

## Teachers Agreeing With ReformOriented Beliefs About Instruction

$$
\frac{\text { Rar ing }}{\text { R E S EAM C H, INC. }}
$$

## Teacher Beliefs

$\square$ Elementary $\quad$ Middle

- High

THE NATIONAL SURVEY OF SCIENCE \& MATHEMATICS EDUCATION

## High School Teachers

At the beginning of instruction on a science idea, students should be provided with definitions for new scientific vocabulary that will be used.

## Perceptions of Preparedness

The 2018 NSSME+ included items about teachers' feelings of preparedness to:

- Teach the science content of their class
- Use student-centered pedagogies, e.g.:
- Use formative assessment
- Develop student abilities to do science
- Encourage student interest in science
- Differentiate instruction
- Incorporate students' cultural backgrounds into instruction

## Elementary Teachers' Considering Themselves Very Well Prepared to Teach Each Subject

## Degree in Science/Engineering/ Science Education

## High School Science Teachers With Degree in Subject

## Elementary Teachers' College Coursework

About what percentage of elementary science teachers have had at least one college course each in Earth, life, and physical science?
A. $20 \%$
B. $30 \%$
C. $40 \%$
D. $50 \%$

## Elementary Teachers' College Coursework: Earth, Life, Physicall Sciences

## Percent of Elementary Teachers

$\square$ No courses in these areas

Course in 1 of 3 areas

Courses in 2 of 3 areas

Courses in all 3 areas

# Middle School Teachers' College Coursework: Chemistry, Earth Science, Life Science, Physics 

## Percent of Middle Grades Teachers

No courses in these areas

Courses in 1 of 4 areas

Courses in 2 of 4 areas

Courses in 3 of the 4 areas

Courses in all 4 areas

## Equity Analyses: Secondary

 Classes Taught loy Teacher With Degree/3+ Advanced Courses

## Science Teachers Takeaways

Teachers' beliefs about teaching and learning only partially align with what is known about how students learn science.

Elementary teachers do not feel nearly as well prepared to teach science as do secondary teachers, which is not surprising given they have taken relatively few college courses in science.

Low prior-achieving students and those in schools with large proportions of FRL-eligible students are less likely to have a well-prepared teacher.

## Inservice Support

## The 2018 NSSME+ asked about:

- School/district-offered professional development (workshops, study groups/PLCs, coaching)
- Teacher PD experiences

## Professional Development

About what percentage of high school science teachers have had more than 35 hours of PD in the last three years?
A. $30 \%$
B. $40 \%$
C. $50 \%$
D. $60 \%$

## Professional Development
